

PIG Corrugated Pipe Cradle – 18 inch

Product Information:

This unique 18" Corrugated Pipe Cradle is used to construct tank and other secondary containments. The design eliminates the shifting and/or roll out of the corrugate under load.

- This patent-pending product is designed to fit 18" ID corrugated pipe to produce a 24"-high berm
- The constructed containment is stable and won't move or collapse when full
- No need for hand welding or hundreds of screws since it is self-supporting
- Symmetrical design with easy liner attachment on both sides of the cradle takes the guesswork out of placement
- Cradle placement is every 5' along the length of the corrugated pipe and at the corrugated pipe joints
- The indented cradle holds two corrugated pipes together, which can be screwed securely
- The cradle can also be used as a pipe support for 3"-diameter (or less) pipes at a height of 12"
- Nestable, lightweight design saves transportation charges and storage space (50 units/pallet)
- Durable linear low-density polyethylene (LLDPE) construction provides great UV, chemical and cold crack resistance
- Contains up to 50% recycled polyethylene

PIG® Corrugated Pipe Cradle – 18 inch			
Item #	Dimensions	Weight	Color
PLR1800	34.75"L x 10.25"W x 13"H • .220" Wall Thickness	8 lbs.	Black
