

Tank End Enclosures

Product Information:

These patented heat enclosures protect your manifolds from freezing. The aluminum frames and translucent vinyl panels were designed by oil and gas industry water superintendents.

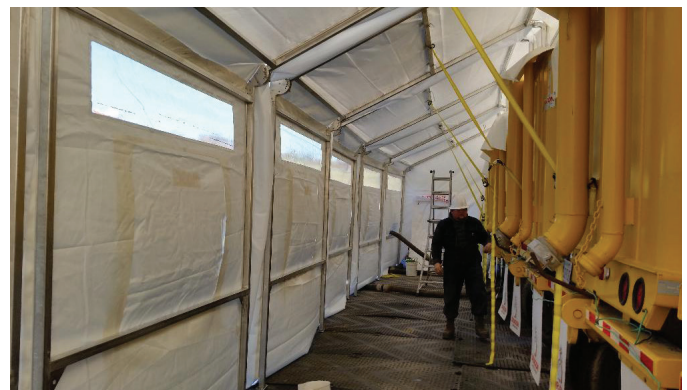

- Patented system designed and tested to withstand high winds and snow accumulation
- 2" aluminum extrusion for lightweight handling enables units to be carried into active sites
- 18-ounce repairable translucent vinyl for bright interior work space
- Simple hose accessibility
- Rotating hinges offer a wide pitch range to cover multiple tank styles
- Two extension length options measured from top of the tank to the deck

17-foot Extension

- Use for tanks with roof handrails
- Use for manifolds not located on the tank
- Use for larger walkway

9-foot Extension

- Use for tanks without roof handrails
- Use for manifolds attached to tanks
- Use for back of tanks without manifold

Tank End Enclosures
